current paradigms of development generally serve mobile pastoralist groups poorly their
visibility in policy processes is minimal and their mobility is constructed by the powerful as a
problem rather than as a rational livelihood strategy increasingly damaged eco systems
shrinking natural resources globalisation and urbanisation all put pressure on pastoralist
livelihoods such processes often worsen rather than alleviate poverty and socio economic
marginalisation among pastoralists but they also precipitate engagement with forms of
education that may improve their future livelihood security and social status and enhance
occupational diversification opening with a discussion of how the relationships between
education poverty and development have been conceived in dominant development discourses
this book reviews the disappointing international experience of education provision to mobile
pastoralist groups it highlights a lack of sufficient flexibility and relevance to changing
livelihoods and more fundamentally education s conceptual location within a sedentarist
paradigm of development that is antagonistic to mobility as a legitimate livelihood strategy

these global themes are examined in india where policy and practices of education inclusion for mobile marginalised groups are critiqued empirically based chapters drawing on ethnographic research provide detailed insights into how the rabaris of kachchh a pastoralist community in gujarat western india engage with education as a social and economic development strategy for both adults and children and show how ethnographic and participatory research approaches can be used for policy advocacy for marginalised groups livelihoods and learning highlights the complex contested and often inconsistent role of education in development and the social construction of poverty and calls for a critical reappraisal of the notion of education the book will be key reading for postgraduates and academics in education development studies international and comparative education and research methodology as well as policy makers ministries and related agencies with responsibility for education

this book offers a meso level description of demographics science education and science teacher education representing all 13 canadian jurisdictions the book provides local insights that serve as the basis for exploring the canadian system as a whole and function as a common starting point from which to identify causal relationships that may be associated with canada s successes the book highlights commonalities consistencies and distinctions across the provinces and territories in a thematic analysis of the 13 jurisdiction specific chapters although the analysis indicates a network of policy and practice issues warranting further consideration the diverse nature of canadian science education makes simple identification of causal relationships elusive canada has a reputation for strong science achievement however there is currently limited literature on science education in canada at the general level or in specific areas such as canadian science curriculum or science teacher education this book fills that gap

by presenting a thorough description of science education at the provincial territorial level as well as a more holistic description of pressing issues for canadian science education
